

# Datasheet for ‘An Analysis of Voter Factors in the 2020 US General Election’\*

Yuchen Chen

March 16, 2024

## Motivation

1. *For what purpose was the dataset created? Was there a specific task in mind? Was there a specific gap that needed to be filled? Please provide a description.*
  - The dataset was created to enable analysis of presidential candidate’s team build effective policies to voters, potentially increasing their support rate and appeal. The main goal was to really look into how things like whether someone is a man or woman, their race, how old they are, and where they live can change who they decide to vote for. But this dataset is only for 2020, which is during the epidemic period, which is a relatively special historical background. Therefore, the results of this study have certain time limitations.
2. *Who created the dataset (for example, which team, research group) and on behalf of which entity (for example, company, institution, organization)?*
  - The dataset was created by a team including Brian Schaffner, Stephen Ansolabehere, and Sam Luks. It was a part of the CCES Dataverse, which is associated with Harvard University and Tufts University. The study includes data from a survey of American adults and aims to provide a comprehensive look at voter opinions and behaviors for the 2020 US General Election.
3. *Who funded the creation of the dataset? If there is an associated grant, please provide the name of the grantor and the grant name and number.*
  - The Cooperative Election Study (CES) for the year 2020 was supported by the National Science Foundation (NSF) under the award number 1948863, managed by Program Officer Jan Leighley.

## Composition

---

\*Code and data are available at: <https://github.com/Victor1114/Political-support-in-the-United-States>

1. *What do the instances that comprise the dataset represent (for example, documents, photos, people, countries)? Are there multiple types of instances (for example, movies, users, and ratings; people and interactions between them; nodes and edges)? Please provide a description.*
  - In studies like the 2020 Cooperative Election Study (CES), the instances represent individual survey responses from 61,000 American adults voters with many different aspects like, various regions, ages, genders, racial groups, etc.
2. *How many instances are there in total (of each type, if appropriate)?*
  - 61,000 American adults
3. *Does the dataset contain all possible instances or is it a sample (not necessarily random) of instances from a larger set? If the dataset is a sample, then what is the larger set? Is the sample representative of the larger set (for example, geographic coverage)? If so, please describe how this representativeness was validated/verified. If it is not representative of the larger set, please describe why not (for example, to cover a more diverse range of instances, because instances were withheld or unavailable).*
  - It is a sample of the larger set of eligible voters in the United States but it is not all possible instances because it would be impractical to survey every single voter. The sample is designed to be representative of the larger population, with participants selected to reflect the demographics and geographic distribution of the nation’s electorate. Representativeness is often validated by comparing the sample demographics to known characteristics of the population, such as census data, and ensuring that the sample includes people from various regions, ages, genders, racial groups, etc.
4. *What data does each instance consist of? “Raw” data (for example, unprocessed text or images) or features? In either case, please provide a description.*
  - Gender, age, race, census area, and presidential preferences of voters.
5. *Is there a label or target associated with each instance? If so, please provide a description.*
  - **Gender:** The sex of the voter.
  - **Age:** The age of the voter at the time of the survey.
  - **Race:** The race or ethnicity the voter identifies with.
  - **Census Area:** Geographic information such as the voter’s residence, which could be a state or a more specific area like a congressional district.
  - **Presidential Preferences:** This could include the voter’s choice of presidential candidate or preferences on various political issues relevant to the presidential election.
6. *Is any information missing from individual instances? If so, please provide a description, explaining why this information is missing (for example, because it was unavailable).*

*This does not include intentionally removed information, but might include, for example, redacted text.*

- It's possible because in guide of dataset, the first category shows some individual instances didn't fully answer the survey which makes some individual instances will miss information.
7. *Are relationships between individual instances made explicit (for example, users' movie ratings, social network links)? If so, please describe how these relationships are made explicit.*
    - There is not relationship stated in survey or dataset between survey responses, but we can analyze the dataset by analyzing the relationship different responses with different features and how their behavior in voting to made relationship explicit.
  8. *Are there recommended data splits (for example, training, development/validation, testing)? If so, please provide a description of these splits, explaining the rationale behind them.*
    - TBD
  9. *Are there any errors, sources of noise, or redundancies in the dataset? If so, please provide a description.*
    - TBD
  10. *Is the dataset self-contained, or does it link to or otherwise rely on external resources (for example, websites, tweets, other datasets)? If it links to or relies on external resources, a) are there guarantees that they will exist, and remain constant, over time; b) are there official archival versions of the complete dataset (that is, including the external resources as they existed at the time the dataset was created); c) are there any restrictions (for example, licenses, fees) associated with any of the external resources that might apply to a dataset consumer? Please provide descriptions of all external resources and any restrictions associated with them, as well as links or other access points, as appropriate.*
    - TBD
  11. *Does the dataset contain data that might be considered confidential (for example, data that is protected by legal privilege or by doctor-patient confidentiality, data that includes the content of individuals' non-public communications)? If so, please provide a description.*
    - TBD
  12. *Does the dataset contain data that, if viewed directly, might be offensive, insulting, threatening, or might otherwise cause anxiety? If so, please describe why.*
    - TBD

13. *Does the dataset identify any sub-populations (for example, by age, gender)? If so, please describe how these subpopulations are identified and provide a description of their respective distributions within the dataset.*
  - TBD
14. *Is it possible to identify individuals (that is, one or more natural persons), either directly or indirectly (that is, in combination with other data) from the dataset? If so, please describe how.*
  - TBD
15. *Does the dataset contain data that might be considered sensitive in any way (for example, data that reveals race or ethnic origins, sexual orientations, religious beliefs, political opinions or union memberships, or locations; financial or health data; biometric or genetic data; forms of government identification, such as social security numbers; criminal history)? If so, please provide a description.*
  - TBD
16. *Any other comments?*
  - TBD

### Collection process

1. *How was the data associated with each instance acquired? Was the data directly observable (for example, raw text, movie ratings), reported by subjects (for example, survey responses), or indirectly inferred/derived from other data (for example, part-of-speech tags, model-based guesses for age or language)? If the data was reported by subjects or indirectly inferred/derived from other data, was the data validated/verified? If so, please describe how.*
  - TBD
2. *What mechanisms or procedures were used to collect the data (for example, hardware apparatuses or sensors, manual human curation, software programs, software APIs)? How were these mechanisms or procedures validated?*
  - TBD
3. *If the dataset is a sample from a larger set, what was the sampling strategy (for example, deterministic, probabilistic with specific sampling probabilities)?*
  - TBD
4. *Who was involved in the data collection process (for example, students, crowdworkers, contractors) and how were they compensated (for example, how much were crowdworkers paid)?*

- TBD
5. *Over what timeframe was the data collected? Does this timeframe match the creation timeframe of the data associated with the instances (for example, recent crawl of old news articles)? If not, please describe the timeframe in which the data associated with the instances was created.*
    - TBD
  6. *Were any ethical review processes conducted (for example, by an institutional review board)? If so, please provide a description of these review processes, including the outcomes, as well as a link or other access point to any supporting documentation.*
    - TBD
  7. *Did you collect the data from the individuals in question directly, or obtain it via third parties or other sources (for example, websites)?*
    - TBD
  8. *Were the individuals in question notified about the data collection? If so, please describe (or show with screenshots or other information) how notice was provided, and provide a link or other access point to, or otherwise reproduce, the exact language of the notification itself.*
    - TBD
  9. *Did the individuals in question consent to the collection and use of their data? If so, please describe (or show with screenshots or other information) how consent was requested and provided, and provide a link or other access point to, or otherwise reproduce, the exact language to which the individuals consented.*
    - TBD
  10. *If consent was obtained, were the consenting individuals provided with a mechanism to revoke their consent in the future or for certain uses? If so, please provide a description, as well as a link or other access point to the mechanism (if appropriate).*
    - TBD
  11. *Has an analysis of the potential impact of the dataset and its use on data subjects (for example, a data protection impact analysis) been conducted? If so, please provide a description of this analysis, including the outcomes, as well as a link or other access point to any supporting documentation.*
    - TBD
  12. *Any other comments?*
    - TBD

## Preprocessing/cleaning/labeling

1. *Was any preprocessing/cleaning/labeling of the data done (for example, discretization or bucketing, tokenization, part-of-speech tagging, SIFT feature extraction, removal of instances, processing of missing values)? If so, please provide a description. If not, you may skip the remaining questions in this section.*
  - TBD
2. *Was the “raw” data saved in addition to the preprocessed/cleaned/labeled data (for example, to support unanticipated future uses)? If so, please provide a link or other access point to the “raw” data.*
  - TBD
3. *Is the software that was used to preprocess/clean/label the data available? If so, please provide a link or other access point.*
  - TBD
4. *Any other comments?*
  - TBD

## Uses

1. *Has the dataset been used for any tasks already? If so, please provide a description.*
  - TBD
2. *Is there a repository that links to any or all papers or systems that use the dataset? If so, please provide a link or other access point.*
  - TBD
3. *What (other) tasks could the dataset be used for?*
  - TBD
4. *Is there anything about the composition of the dataset or the way it was collected and preprocessed/cleaned/labeled that might impact future uses? For example, is there anything that a dataset consumer might need to know to avoid uses that could result in unfair treatment of individuals or groups (for example, stereotyping, quality of service issues) or other risks or harms (for example, legal risks, financial harms)? If so, please provide a description. Is there anything a dataset consumer could do to mitigate these risks or harms?*
  - TBD
5. *Are there tasks for which the dataset should not be used? If so, please provide a description.*

- TBD
6. *Any other comments?*
- TBD

## Distribution

1. *Will the dataset be distributed to third parties outside of the entity (for example, company, institution, organization) on behalf of which the dataset was created? If so, please provide a description.*
  - TBD
2. *How will the dataset be distributed (for example, tarball on website, API, GitHub)? Does the dataset have a digital object identifier (DOI)?*
  - TBD
3. *When will the dataset be distributed?*
  - TBD
4. *Will the dataset be distributed under a copyright or other intellectual property (IP) license, and/or under applicable terms of use (ToU)? If so, please describe this license and/ or ToU, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms or ToU, as well as any fees associated with these restrictions.*
  - TBD
5. *Have any third parties imposed IP-based or other restrictions on the data associated with the instances? If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any relevant licensing terms, as well as any fees associated with these restrictions.*
  - TBD
6. *Do any export controls or other regulatory restrictions apply to the dataset or to individual instances? If so, please describe these restrictions, and provide a link or other access point to, or otherwise reproduce, any supporting documentation.*
  - TBD
7. *Any other comments?*
  - TBD

## Maintenance

1. *Who will be supporting/hosting/maintaining the dataset?*

- TBD
2. *How can the owner/curator/manager of the dataset be contacted (for example, email address)?*
    - TBD
  3. *Is there an erratum? If so, please provide a link or other access point.*
    - TBD
  4. *Will the dataset be updated (for example, to correct labeling errors, add new instances, delete instances)? If so, please describe how often, by whom, and how updates will be communicated to dataset consumers (for example, mailing list, GitHub)?*
    - TBD
  5. *If the dataset relates to people, are there applicable limits on the retention of the data associated with the instances (for example, were the individuals in question told that their data would be retained for a fixed period of time and then deleted)? If so, please describe these limits and explain how they will be enforced.*
    - TBD
  6. *Will older versions of the dataset continue to be supported/hosted/maintained? If so, please describe how. If not, please describe how its obsolescence will be communicated to dataset consumers.*
    - TBD
  7. *If others want to extend/augment/build on/contribute to the dataset, is there a mechanism for them to do so? If so, please provide a description. Will these contributions be validated/verified? If so, please describe how. If not, why not? Is there a process for communicating/distributing these contributions to dataset consumers? If so, please provide a description.*
    - TBD
  8. *Any other comments?*
    - TBD
